PROFILE SUMMARY

Prospective full stack developer with a strong foundation in computer science and engineering. Proven ability to learn new technologies quickly and apply them to real-world projects. Seeking an opportunity to use my skills and knowledge to make a positive impact on the world.

EDUCATION HISTORY

Doctorate

Course	B.Tech(Computer Science and Engineering)
College	Lovely Professional University (LPU)
Year of Passing	2025
Grade	8.3/10

WORK EXPERIENCE

Jun 2023 to Present

Full Stack Developer Trainee at Programming Paths hala

Responsibilities:

Learned the basics of web development using the MERN stack, including React, Node.js, Express, and MongoDB. Worked on a food ordering website project, from planning and design to development and deployment. Collaborated with other interns and mentors to learn and grow as a developer.

Accomplishments:

Developed a functional food ordering website that allows users to browse menus, view item details, and place orders. Deployed the website to a live server and integrated it with a payment gateway.

Maintained accountability for troubleshooting and resolving support issues.

PROJECTS

Swiggato (Clone of Swiggy with Enhanced User Backend and Attractive Frontend), 1 Months

Swiggato is a web application inspired by the popular food delivery platform Swiggy. This project aimed to recreate the core functionalities of Swiggy while enhancing the user experience and backend management. The project

- Full Stack In Mern On Programming Pathsala
-

SOCIAL LINKS

- <https://www.linkedin.com/in/priyanshu-srivastava-63b059222>

included a user-friendly frontend designed to attract and engage users effectively.

Parking Management System for University (Python Project), 2 Weeks

The Parking Management System is a Python-based project designed to streamline the parking experience within the university premises. The project aimed to provide a user-friendly interface through which students and staff could view available parking slots in real-time and conveniently reserve slots.

VIRTUAL ZOO AND 3D MODEL (ECOHOLO ZOO), 2 Days

- JavaScript, Xamp, React, HTML, CSS
- The Virtual Zoo and 3D Model implementation is a Web application which is particularly designed for schools, museums, and ministry. This project we have made during the participation in ???Smart India Hackathon??? which helps the users to easily gain knowledge about the extinct and existing species (flora and fauna) present on this earth. The project included a user-friendly frontend designed to attract and engage users effectively.

EXTRA-CURRICULAR ACTIVITY

Smart India Hackathon 2023

I recently participated in the Smart India Hackathon 2023, where I successfully developed a website called "Virtual Zoo" along with a 3D model within a demanding 36-hour timeframe. I consider this achievement as an extracurricular activity that has significantly enriched my skills and experience.
